

UROLOGY CLERKSHIP LOGS

We ask that you use urology clerkship logs to document the educational experiences you have while on your urology rotation. You'll find enclosed with your handbook, a yellow urology clerkship log. Please carry it with you in the OR and in clinic. Ask the resident or attending instructor to sign and date your log after participating in one of the learning objectives. More than one instructor can sign off on a particular activity. You will be required to turn these in on the last day of your rotation.
